

Double-Reduction Helical Gearbox Teardown and Repair Analysis

A. Job information

Customer name

Work order number

Date received

Manufacturer

Model

Serial number

Overall reduction

: 1

Stage 1 ratio

: 1

Stage 2 ratio

: 1

Oil capacity

Oil grade

Application / driven equipment

Service hours (if known)

Reported failure / customer complaint

B. As-received condition

☐

Photos taken as received

Notes:

☐

External damage, cracks, missing parts

Notes:

☐

Nameplate present and legible

Notes:

Shafts turn freely by hand

☐

Yes

☐

No

Notes:

☐

Noise or roughness when turned

Notes:

☐

Oil leaks at seals / split line / plugs

Notes:

☐

Breather condition

Notes:

Ram Gear Gearbox Evaluation

C. Oil condition

Oil drained - volume recovered

Oil sample ID (lab analysis)

☐ Oil sample taken for lab analysis

Appearance: ☐ Clean ☐ Dark ☐ Milky (water) ☐ Sludge ☐ Metallic particles

Magnetic drain plug debris description

D. As-found measurements before teardown

Endplay - Input shaft

Endplay - Intermediate shaft

Endplay - Output shaft

Backlash - Stage 1

Backlash - Stage 2

Ext. runout - Input shaft

Ext. runout - Output shaft

E. Teardown checklist

☐ Match-mark housing, caps, and shafts before disassembly

☐ Parts tagged and kept in order

☐ Seals removed and inspected

AS-FOUND SHIM RECORD

Shaft	Drive end (DE) as-found shim (in/mm)	Non-drive end (NDE) as-found shim (in/mm)
Input		
Intermediate		
Output		

Ram Gear Gearbox Evaluation

F. Component inventory and repair assessment

Input shaft

☐ Reuse ☐ Repair ☐ Replace

Part no.:

Findings:

Input pinion (stage 1)

☐ Reuse ☐ Repair ☐ Replace

Part no.:

Teeth:

Findings:

Intermediate shaft

☐ Reuse ☐ Repair ☐ Replace

Part no.:

Findings:

Intermediate gear (stage 1)

☐ Reuse ☐ Repair ☐ Replace

Part no.:

Teeth:

Findings:

Intermediate pinion (stage 2)

☐ Reuse ☐ Repair ☐ Replace

Part no.:

Teeth:

Findings:

Output shaft

☐ Reuse ☐ Repair ☐ Replace

Part no.:

Findings:

Output gear (stage 2)

☐ Reuse ☐ Repair ☐ Replace
